

CREATIO MARKETPLACE PARTNER PROGRAM: APPLICATION PRICING AND REVENUE DISTRIBUTION

MARKETPLACE LISTINGS PRICING

Feel free to choose a business model for your Marketplace solution. The right business model aligns your goals with the expectations of your target market and allows you to get the most out of your solution on Creatio Marketplace.

- **PAID**

Paid applications and products are available at Creatio Marketplace on a subscription basis, similar to the base applications and products of Creatio. This model allows users to pay and get access to the application for a defined limited period - one year as a standard model. Once the subscription of an application expires, the customer can renew the subscription, which ensures the annual recurring revenue of your application. The success component of this business model is the quality services provided by the Marketplace Partner and professional product maintenance along with the technical support that will increase the probability of subscription renewal. When choosing a paid model, a Partner specifies a fixed price for each of its products. There can be several versions of products (for example, basic, advanced, etc.). In this case, the cost must be indicated for each of them.

- **FREE**

The free business model is mostly designed to generate leads. Such products help build brand awareness and drive customer base growth. If you are a vendor (ISV) and plan to create an integration with Creatio products, choose the free connector promotion model. By placing it on the Creatio Marketplace you will attract new customers and open a new channel of revenue by selling your product with the free connector with Creatio.

If the Marketplace application's price and/or conditions have been changed after they were offered to the client, the Creatio/Sales Partner/Marketplace Partner may, within 1 month, sell this application at the price and/or conditions that were valid at the time offer was presented, without agreement with other participants.

REVENUE DISTRIBUTION MODEL

The financial model of revenue distribution determines the commission rate for the Marketplace applications and products received by the parties from the sale. Marketplace applications and products can be sold through the following channels:

- **Creatio Sales Team**
- **Marketplace Partner**
- **Sales Partner**

CREATIO	SALES PARTNER	MARKETPLACE PARTNER
Creatio registered a lead for a partner's Marketplace application and closed the deal by the Creatio sales team.	Any Creatio partner who registered a lead for a Marketplace application published/developed by another partner and closed the deal.	A partner who developed the Marketplace application

Revenue distribution is applied for:

- **Partner component/application/product** — a component, application or product developed by the Marketplace partner.
- **Creatio component/application/product** — Creatio component, application or product that was used for the development of the Marketplace partner product.

Additional definitions:

- **PP** — commission rate for the Sales Partner on the Creatio component, application, or product according to the Partner's current level of the Creatio Partner Program.
