PRODUCT DESCRIPTION

Word Press plugin Creatio is developed to enable easy and smooth connection of WordPress website web forms to Creatio. It allows to integrate all 4 types of landing pages with Creatio:

- Lead registration
- Order registration
- Case registration
- Event participant registration

Use cases for each type of a landing page are described further [in this document](#).

Field mapping between web forms and Creatio objects can be set up easily and without coding through a user-friendly WordPress wizard.

Should you have any questions or suggestions regarding this application please email us support@flexentric.eu – we are happy to help!

INSTALLATION GUIDE

These are general steps to install the plugin and setup connection with Creatio:

1. You will receive a license key by email.
2. Install plugin.
 - a. Download from marketplace.
 - b. Go to Plugins > Add New > Upload plugin > Choose file

 - d. Set up parameters and default values
6. Connect the website landing page to the Creatio landing page
 - a. Go to Contact > Go to Contact forms
 - b. Open Contact form in edit mode
 - c. Go to tab Creatio fields mapping
 - d. Select landing page type
 - e. Select landing page
 - f. Select a corresponding field from Creatio for each field from the Contact form g.
Press Save

h. Connection completed

If you need to connect an extra landing page to Creatio simply repeat steps 3 to 5.

USE CASES

LANDING PAGE: LEAD REGISTRATION FORM

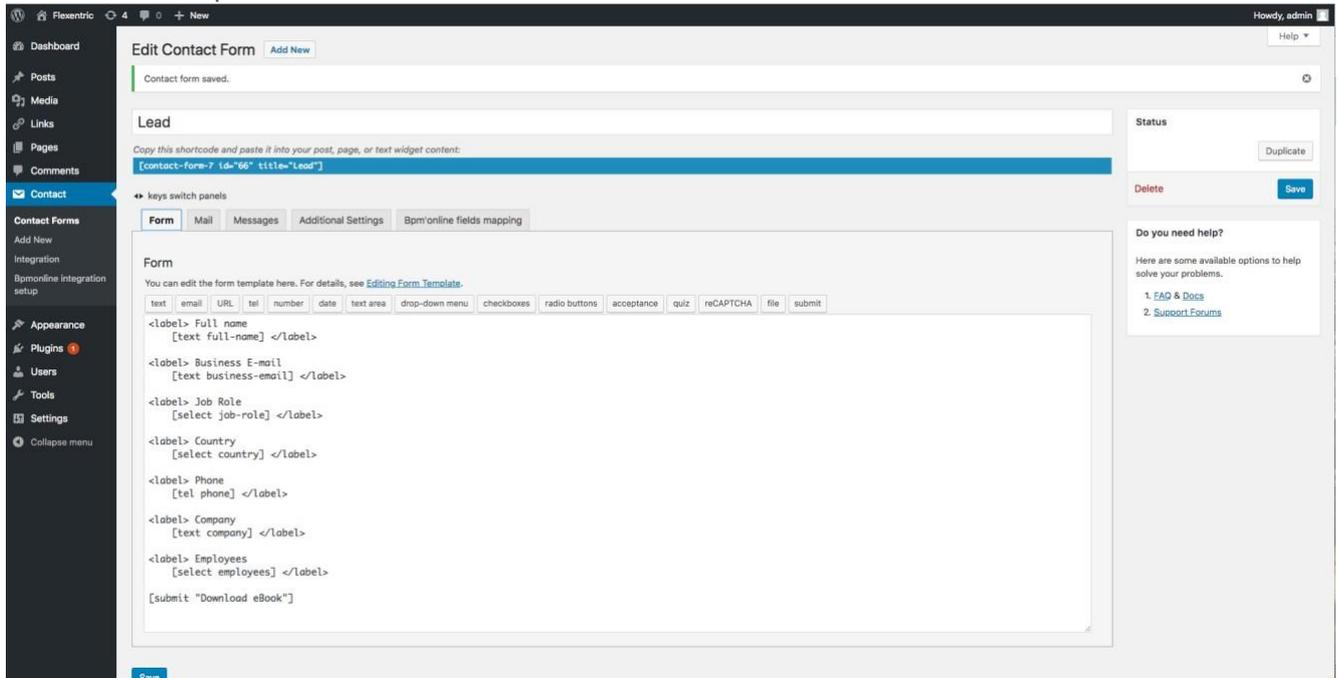

Case description: On your website you can create a page with a preview of an eBook. To download this eBook website user needs to submit a web form which will generate a lead in Creatio.

Other cases with Lead registration form: Contact us, Subscription for newsletter, Request for products or services, etc.

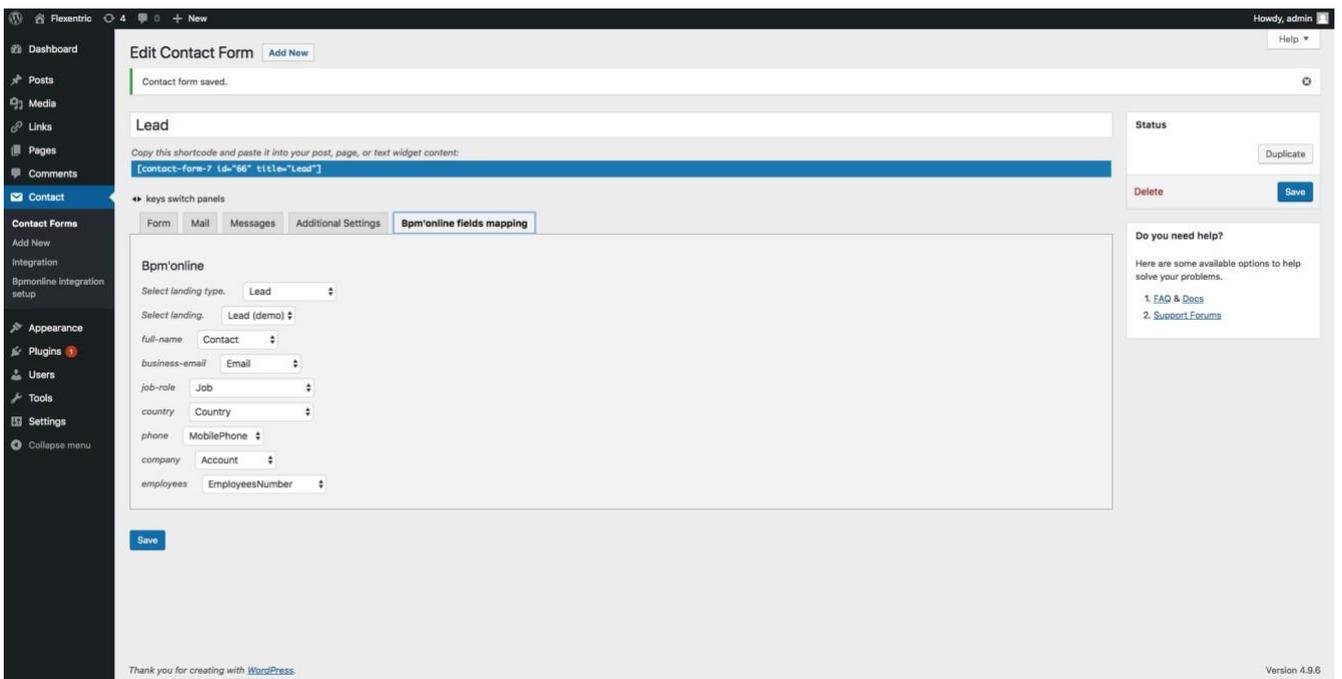

Suggested fields mapping

Contact Form 7	Data type	Mandatory	Creatio (object Lead)
Full name	Text	Optional	Contact
Business E-mail	Text	Optional	Email
Job Role	Lookup	Optional	Job
Country	Lookup	Optional	Country
Phone	Text	Optional	MobilePhone
Company	Text	Optional	Account
Employees	Lookup	Optional	EmployeesNumber
	Lookup	Mandatory	Default: Customer need = eBook This can be defined in default values of the landing page in Creatio

Contact Form 7 fields mapping

LANDING PAGE:

Case description:

ORDER REGISTRATION FORM

On your website you can create a page with a request for product or service. This page is targeted on existing customers (already existing Contacts in Creatio). Product or service request from new customers can be better handled through a Lead registration form. Suggested fields mapping

Contact Form 7	Data type	Mandatory	Creatio (object Order)
Recipient's name	Text	Optional	ReceiverName
Phone	Text	Optional	ContatNumber
Delivery address	Text	Optional	DeliveryAddress
Notes	Text	Optional	Comment
	Lookup	Optional	Default: Order channel = Website

Contact Form 7 preview

The screenshot shows the WordPress admin interface for editing a Contact Form 7 form. The form is titled "Order". The main content area displays the form's shortcode: `[contact-form-7 id="75" title="Order"]`. Below this, there are tabs for "Form", "Mail", "Messages", "Additional Settings", and "Bpm'online fields mapping". The "Form" tab is active, showing a text editor with the following HTML code:

```
<label> Receiver name
[text receiver-name] </label>

<label> Phone
[tel phone] </label>

<label> Delivery address
[text delivery-address] </label>

<label> Notes
[textarea notes] </label>

[submit "Order"]
```

 A "Save" button is located at the bottom left of the form editor. On the right side, there is a "Status" section with a "Duplicate" button, a "Delete" button, and a "Save" button. Below that is a "Do you need help?" section with links to "FAQ & Docs" and "Support Forums".

Contact Form 7 fields mapping

The screenshot shows the "Bpm'online fields mapping" tab for the "Order" contact form. The "keys switch panels" section is active, displaying a list of fields and their corresponding mapping options:

- landing type: Order
- Select landing: Order (demo)
- receiver-name: ReceiverName
- phone: ContactNumber
- delivery-address: DeliveryAddress
- notes: Comment

 A "Save" button is located at the bottom left of the mapping section. The right sidebar remains the same as in the previous screenshot, showing "Status", "Delete", "Save", and "Do you need help?" sections.

CASE REGISTRATION FORM

LANDING PAGE:

Case description:

On your website you can create a page to register support / customer service tickets. Your customers can choose request category and provide you with request details.

Suggested fields mapping

Contact Form 7	Data type	Mandatory	Creatio (object Case)
Name	Text	Mandatory	Name
Phone	Text	Mandatory	Phone
Email	Text	Mandatory	Email
Category	Lookup	Optional	Category
Subject	Text	Mandatory	Subject
Description	Text	Mandatory	Symptoms
	Lookup	Optional	Default: Source = Site

Without fields Name, Phone, Email and Subject this connection won't work. Values of Name, Phone and Email are used to match a new case to an existing Contact in Creatio.

Contact Form 7 preview

The screenshot shows the 'Edit Contact Form' interface in WordPress. The main content area is titled 'Form' and contains a code editor with the following HTML template:

```
<label> Name (required)
[text* customer-name] </label>

<label> Phone (required)
[tel* phone] </label>

<label> Email (required)
[email* email] </label>

<label> Category
[select category] </label>

<label> Subject (required)
[text* subject] </label>

<label> Description (required)
[textarea* description] </label>

[submit "Submit request"]
```

Below the code editor, there is a 'Save' button. On the right side, there is a 'Status' section with a 'Duplicate' button and a 'Delete' button. Below that, there is a 'Do you need help?' section with links to 'FAQ & Docs' and 'Support Forums'.

Contact Form 7 fields mapping

The screenshot shows the 'Edit Contact Form' interface in WordPress, specifically the 'Bpm'online fields mapping' tab. The main content area is titled 'Bpm'online' and contains the following configuration options:

- Select landing type: Case
- Select landing: Case (demo)
- customer-name: Name
- phone: Phone
- email: Email
- category: Category
- subject: Subject
- description: Symptoms

Below the configuration options, there is a 'Save' button. On the right side, there is a 'Status' section with a 'Duplicate' button and a 'Delete' button. Below that, there is a 'Do you need help?' section with links to 'FAQ & Docs' and 'Support Forums'.

LANDING PAGE:

Case description:

EVENT PARTICIPANT REGISTRATION FORM

On your website you can create a page to register support / customer service tickets. Your customers can choose request category and provide you with request details.

Suggested fields mapping

Contact Form 7	Data type	Mandatory	Creatio (object Case)
Contact	Text	Mandatory	Contact
Job title	Text	Mandatory	Contact.JobTitle
Mobile	Text	Optional	Contact.Mobile
Email	Text	Mandatory	Contact.Email
		Mandatory	Default: Event=[]
		Mandatory	Default: Response=Participation confirmed

It's recommended to set event by default in Creatio Landing page and not let the user to select Event from the list of all events, because the list will show both past and future events.

Contact Form 7 preview

The screenshot shows the WordPress admin interface for editing a Contact Form 7 form. The page title is "Edit Contact Form" with a sub-header "Event participant". A shortcode is displayed: `[contact-form-7 id="81" title="Event participant"]`. Below this, there are tabs for "Form", "Mail", "Messages", "Additional Settings", and "Bpm'online fields mapping". The "Form" tab is active, showing a text editor with the following HTML code:

```
<label> Name (required)
[ text customer-name ] </label>

<label> Job title (required)
[ text job-title ] </label>

<label> Phone (required)
[ tel phone ] </label>

<label> Email (required)
[ email email ] </label>

[ submit "Register now" ]
```

On the right side, there is a "Status" section with a "Duplicate" button, a "Delete" button, and a "Save" button. Below that is a "Do you need help?" section with links to "FAQ & Docs" and "Support Forums".

Contact Form 7 fields mapping

The screenshot shows the "Bpm'online fields mapping" section of the "Edit Contact Form" screen. The "Bpm'online" section is active, showing the following configuration:

- Select landing type: Event participant
- Select landing: Event registration (demo)
- customer-name: Contact
- job-title: Contact.JobTitle
- phone: Contact.Mobile
- email: Contact.Email

At the bottom of the page, there is a "Thank you for creating with WordPress." message and a "Version 4.9.6" footer.
