2. Connector settings

For the correct operation of the connector, you need to get **API keys Key YouControl key -** API key for obtaining general information about the counterparty.

Key for express analysis YouControl - API key for Express analysis and verification of the organization's connection with the aggressor country.

To receive ARI-keys from the YouControl service, you need to contact the responsible manager of the company, who will provide the necessary advice and ARI-keys

Head of Development partnerships - Roman Gerbiy Phone(viber/telegram) - +38 067 905 84 93 Email:

- roman.gerbiy@youcontrol.com.ua
- support@youcontrol.com.ua

Information to be provided when applying:

- The company name
- EDRPOU

- e-mail of the contact person (to this e-mail will be sent messages about novelties in the API, as well as messages about changes or problems with registries)
- IP addresses for the whitelist.

Test keys

Pay attention! Keys have a limited number of attempts and a limited period. When they expire, the application will stop working and you must purchase paid keys.

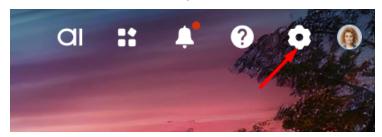

You can get advice or test keys for Express Analysis and communication with the aggressor country (Russia, Belarus) from a YouControl employee

roman.gerbiy@youcontrol.com.ua

Or you can get test keys through the ready-made application form https://youcontrol.com.ua/services/#services-api
