## Intra-African mobility

Our presence in Morocco, Algeria, Tunisia, DRC, Madagascar and openness to all of Africa, gives us a great capacity to mobilize our talents from these different countries. Employees of these states are not required to have a VISA to travel and work in the country where the need is needed.

We have created this African mobility an asset, an element of loyalty and retention of our employees.

Our approach is to offer our capacity for innovation, production from the country of origin of the talents, create value in the countries. We bring a real ROI in the context of compliance respected (Iso27000, PAS, PAM), societal, responsible, in the free right of the standards Iso26000 (CSR: corporate social responsibility), ISSB (International Sustainability Standards Board), .... Talent management has no borders and the standardization of remote work requires an evolution of management.

# Working models

## Consulting

You don't need to know technology to turn your idea into reality. We will consult you on the technical implementation of the concept, we will help you define the needs and prepare the specifications to develop a turnkey solution from scratch.

## Activity outsourcing

We assign a dedicated development team, with a project manager and a team leader. Naxxum Group is responsible for resource management, task allocation and implementation control, while responsibility for the product itself remains with the customer.

## Turnkey project

We are ready to develop a working solution if your specifications are well written. Our team takes care of the entire project, from UX/UI design to DevOps. You control and accept the deliverables, while everything else is on our side.

## Increase in resources

If you need IT professionals with specific skills or expertise in a particular area, we are ready to provide the right person for your team. In this case, the reception, management, assignment of tasks and follow-up are entirely under your control.

## Partners

# They trust us

The world-renowned international companies we help  
Solve **strategic, operational and organizational** problems.

BNP PARIBAS

**Management**

**Certification**

**Sécurité de  
l'information**

# You will **Never** work Alone
